- Solutions for the US market

Our technology products and frameworks are organized into five offerings, reflecting five areas in which banks face major business challenges.

- Data
- Design
- Integration
- Interaction
- Platform

INNOVATIVE SOFTWARE

Temenos software is the world’s most comprehensive, integrated and fully upgradeable solution for banks embracing digitalization and open banking.

OUR SOFTWARE

A complete and integrated software platform for banks.

Temenos builds and supports the world’s leading software platform for banking. Our software covers the full range of activities of banks and similar financial institutions from front-to-back and across all types of bank and banking activity. The same software is pre-packaged into a series of Suites adapted for the retail, wealth and corporate banking verticals. Suites are also available for the more specialist areas of banking including Islamic and microfinance. In this way our industry-leading levels of investment in our software benefit all our clients in all types of banks.

Our clients can take a complete solution based on our platform or alternatively implement specific modules to address specific issues or requirements. This approach lends itself well to larger banks who wish to conduct a lower risk, phased migration to our platform; an approach called progressive renovation.

We strive to ensure that all of our modules are market-leading in their own right and able to compete with ‘best of breed’ competitors. At the same time we invest in full integration of our modules so banks who choose to implement a full Temenos solution gain significant additional benefit.

We invest heavily in our software platform to ensure that it remains fully up to date regarding banking practice, regulation and technology. Our clients are able to benefit from this investment because of our disciplined package approach where all our software is fully upgradeable.
